

SUMMARY

Senior Software Engineer & Security Architect specializing in building enterprise-grade security automation ecosystems and high-volume backend platforms for Fortune-100 SaaS companies including **Splunk**, **Netskope**, **Mimecast**, **StrongDM** & **Align Technology**. Expert in **GoLang**, **Python**, **Kubernetes**, and designing resilient simulation infrastructures. Proven track record of reducing manual security operations by 80-95% and architecting workflows that scale to handle millions of telemetry events.

TECHNICAL SKILLS

Languages	: Go (Golang), Python, JavaScript, SQL
Frameworks	: React.js, Gin, Flask, FastAPI, gRPC
Cloud & DevOps	: AWS, Kubernetes (K8s), Docker, Terraform, Event-Driven Arch
Databases	: PostgreSQL, Redis, MariaDB, ClickHouse
Observability & Tools	: Splunk, LLM Integration, GitLab CI, Git, Jira

EXPERIENCE

Crest Data	Apr 2023 - Present
Senior Software Engineer	Ahmedabad, India

- License Provisioning System:** Engineered a high-availability license provisioning tool for **Netskope**, a leading cloud security platform, slashing manual workflows by **95%** and dramatically boosting operational efficiency.
- Engineering Leadership:** Led the R&D phase for an internal AI platform, architecting the proof-of-concept and establishing **GenAI coding standards** that are now being adopted by the wider engineering team.
- Data Simulation Pipeline:** Architected a high-throughput **AWS** telemetry pipeline for **Mimecast**, generating **1M+** daily events to validate integrations across **15+ security platforms** (CrowdStrike, Palo Alto, Okta), ensuring resilience at enterprise scale.
- Security Automation & DAST:** Spearheaded & designed a cloud-agnostic DAST scanning framework using **GoLang**, **k8s**, and **Terraform** to enforce security standards across AWS and GCP for **Splunk's** observability platform.

Crest Data	Dec 2019 - Apr 2023
Software Engineer	Ahmedabad, India

- MS Teams Access App:** Developed a widely adopted Microsoft Teams application for **StrongDM** using **GoLang**, enabling real-time user permission validation for external stakeholders.
- Security Testing Framework:** Architected an automation framework for **Splunk** integrated with **GitLab CI** and **Python**, utilizing the attack-range tool for continuous security content validation.
- Report Automation:** Created a **ReactJS** and **Python** web application for **Align Technology** to automate report generation and email distribution, significantly enhancing reporting efficiency.
- Jira Synchronization Engine:** Built an internal synchronization service using **GoLang** and **ReactJS** to replicate user worklogs across disparate Jira servers, cutting manual data entry efforts by **90%**.

EDUCATION

B.Tech in Information Technology	2016 - 2020
Birla Vishvakarma Mahavidyalaya	

HONORS & AWARDS

- CAP Award:** Recognized for outstanding delivery of the ESCU security automation project at Crest Data.
- Expert Speaker:** Invited as an expert speaker on "Cross-platform Application Development (Flutter)" at Birla Vishvakarma Mahavidyalaya.
